

PHASE 4
UCSD Engineering
Family Function and Job Function Summary

Job Family	Job Function	Job Summary
Engineering	Research & Development	Involves professional engineering and engineering technician support as part of academic instructional lab and / or research projects and programs. Engineering activities include the design, construction, testing of experimental systems, operation of analytical systems, establishment of performance specifications, and documentation. Engineering Technicians may be assigned duties within a single discipline (e.g., electrical) or span a range of disciplines [Note: machine specialty work in a research or lab setting is generally performed by the Lab Mechanic job titles].
