Workers' Compensation Notification Pharmacy Benefit Network

Your employer and your workers' compensation claims administrator have partnered with Optum as their workers' compensation pharmacy benefit network (PBN), to provide medications for your work-related injury through their pharmacy network, Tmesys®.

This plan requires that medications (and other services) prescribed for treating your work-related injury can be obtained only from companies or providers specified in your plan. Your employer will provide you information and notification on the network and how to obtain medications upon implementation or when you were hired. But if you have any questions about how to obtain prescribed medications, call 1-866-599-5426.

How to obtain medicines

1. Upon receiving a notice of your injury, your employer will provide you with additional notification of requirements, as well as a First Fill® card.
2. Give the card and prescription to the pharmacist at a participating network pharmacy.
3. The pharmacist will fill your prescription. You should not receive a bill for these medications.
4. A permanent workers' compensation pharmacy card will be mailed to you.
5. Use the pharmacy card each time you have a prescription filled for your work-related injury.

Plan limitations

- You must present your workers' compensation pharmacy card to a participating network pharmacy in order to receive medications.
- Only medications used to treat your work-related injury are covered.
- If your medication is not on the plan's authorized list, the pharmacy will contact Optum to try to obtain approval.
- If a participating network pharmacy charges you for medications, you are not subject to plan limitations.
- Your prescribed medication may be subject to review at the request of your claims administrator.

HOW TO LOCATE A PLAN PHARMACY

More than 5,000 locations in CA
