Under certain circumstances, individuals who are not normally PI eligible may request a PI designation. However, there are risks that researchers in the United States (U.S.) need to be aware of when conducting international research and engagements. The FAQs for Supercomputer Centers to the Entity List as these entities have been determined to conduct activities that are deemed to be inconsistent with U.S. national security and foreign policy interests.

Supercomputer Centers are a widely used and often necessary component in academic research, and their presence in international research projects is increasing. The U.S. government has indicated they will review any software, samples, and equipment. The U.S. Secretary of Commerce, Gina M. Raimondo, said “Supercomputing capabilities are vital to the evaluation of national security-related research.”

Not all employees of the University are eligible to serve as a PI on contracts and grants. PI designation requires that the individual has completed all necessary training and has met the Institutional Review Board (IRB) requirements for the project. In addition, the UC Office of the President (UCOP) requires University employees who received extramural funding to complete the UC Compliance Program.

The Program will offer training through a variety of forums, including workshops, videos, newsletters and other activities, and is designed to serve as an educational resource for all UC San Diego faculty, staff and students. The Program aims to provide comprehensive training on conflicts of interest, data management, and other important topics. The Office of Research Compliance and Integrity (RCI) provides timely notices to the community about upcoming events and training opportunities.

The Research Compliance Hot Topics and Training Program (Program) to all UC San Diego faculty, staff and students. The Program will offer training through a variety of forums, including workshops, videos, newsletters and other activities, and is designed to serve as an educational resource for all UC San Diego faculty, staff and students. The Program aims to provide comprehensive training on conflicts of interest, data management, and other important topics. In order to assist the UCSD Researcher to easily identify whether their PHS training is current, their status can now be viewed on: 1) the Kuali COI “PHS federal gating question” screen, 2) the Kuali Research Proposal Development Views: "Training Completed" and "Training Expired".

The BIMO program is a comprehensive, agency-wide program of inspections and data audits that ensure the integrity of clinical and nonclinical trial data submitted to the Food and Drug Administration (FDA). The Office of Research Integrity (ORI) conducts interactive evaluations of research activities to verify the accuracy, reliability, and integrity of clinical and nonclinical trial data submitted to the FDA.

The Food and Drug Administration (FDA) has released guidance on conducting a voluntary interactive evaluation(s) into a list of observations issued at the close of the inspection on a Form FDA 483. In order to review, observe, examine, and evaluate the necessary information remotely, the FDA will conduct a remote interactive evaluation. The FDA will release a final report that will include a record of the findings and recommendations.
